INACTIVE HAZARDOUS SITES BRANCH**

TELEPHONE LOG

DATE: 07/22/08, 10:15 a.m.

SHEET: 1 OF 1

Call: Placed _____, Received X , Returned _____

PROJECT: Planter's Warehouse	COUNTY: Columbus
CONVERSATION WITH: Terry Kennedy	TELEPHONE: 704-845-4013
AFFILIATION: Terry Kennedy, GRI	
DISCUSSION:	
<p>Terry called because Kyle had just called him and said that I had said that GRI hadn't handled the site correctly. Terry didn't appreciate that, but he needs to know what they need to do to get site closed. I told Terry that I had told Kyle that it probably would have been beneficial if someone had talked to me prior to conducting the pumping. I remembered now that I had spoken with someone (Terry said it was probably Nicole Long), a while back but they hadn't given me much information. I had told Kyle that DWM had jurisdiction over the site now, and we had different requirements. Terry wondered how the site could have been delineated back when Clark conducted their study but not now. I told him that part of the problem probably was that DWQ didn't look at the ammonia. We have to because it is a hazardous substance. I have discussed it with my supervisor and we are willing to consider background samples for the ammonia considering the land usage in that area. But they would definitely have to take more than one background sample. Terry asked about the nitrate delineation. I told him that I didn't have the file in front of me so I couldn't tell him for sure. I also told him that if this was holding up the sale due to liability concerns the buyer could get a Brownfield's Agreement. He said he would discuss that with Kyle. Terry said that he had told Kyle that I had worked with them at the Waccamaw Transport site and asked if he could submit a work plan for this site. I said okay.</p>
